Albina Antony Fathima is a third-year B.Tech Information Technology student. She is interested in software development, web technologies, and emerging technologies in the field of Information Technology. She has experience with programming languages and technologies such as Java, HTML, CSS, JavaScript, React.js, Node.js, Express.js, and MySQL. She is currently improving her skills in full-stack development and data structures and algorithms.

The student actively participates in academic projects, laboratory exercises, seminars, and technical activities. Her areas of interest include web application development, artificial intelligence, machine learning, and natural language processing. She also focuses on improving her problem-solving and programming skills through practical implementation and coding practice.

For academic performance, the student has maintained a good academic record throughout her studies. She believes that consistent practice, learning new technologies, completing projects, and participating in technical activities are important for developing a successful career in the software industry.
